

**PRODUCT FEATURES**

- For Every Military Standard Type Connector
- Broad Range of Finish Platings
- General Duty, Environmental and High-Reliability Performance Classes
- Gender Changers
- Optional Locking Mechanism
- Keyed Polarization
- Fully Repairable

Glenair Sav-Con® Connector Savers: For Every Military Standard Cylindrical Connector

The Smart Solution for Preventing Contact Damage and Extending the Service Life of Cable Assemblies

Glenair Sav-Con® Connector Savers are designed to protect connectors that are subject to repeated mating and unmating cycles. Sav-Con® Connector Savers prevent costly repair or replacement of expensive connectors while preserving the quality and integrity of the connector by absorbing connect and disconnect abuse.

Equipment connectors that are mated and unmated frequently during manufacturing, test, check-out phases and environmental test programs can be protected by Glenair Sav-Con® Connector Savers. The connector savers take the abuse of repeated connection cycles instead of "black box" or other equipment connectors.
